

Tripod Head Quick Release System

1. Screw the tripod quick release assembly onto the tripod.

2. Take enclosed 1/8 hex wrench and tighten the quick release locking screw. The screw is found in the center hole of the sticker pocket.

3. Take one of the two enclosed KES stickers and place in the sticker pocket and firmly press down to ensure it adheres.

4. Now take the tripod head quick release plate and the enclosed 3/8 button head screw then fully tighten down on your tripod head.

5. Now take the enclosed 1/4 -20 cone point lock screw and place in your desired mounting hole.

(The large mounting plate offers 4 threaded holes to choose from)
(the small mounting plate offers 2 threaded holes to choose from)

6. This is what your completed assembly should look like.
